If interested, please send your CV to evgenia.kuznetsowa@itseez.com

About:

Itseez is a company focused on R&D in the area of Computer Vision and intelligent image/video processing. We are also known as Computer Vision Center "Argus". We are developing commercial products and working together with well-known companies on cutting edge computer vision/machine learning technologies. Among our partners and clients are companies like Intel, NVIDIA, Willow Garage and others. We actively participate in the Open Source initiative, developing and supporting OpenCV library, and contributing to Robotics Operation System.

Our engineers have experience in solving practical problems in such areas as:

- video surveillance: head counting, events monitoring, license plate recognition, traffic analysis
- biometric: face recognition, emotions classification and pose detection
- biomedical: X-ray images classification and analysis
- data mining: image and video mining
- image and video enhancement and restoration
- and many more...
