

Smart/Green Manufacturing: Data Enabled Decision Making and Optimization Applications

Panos M. Pardalos

Center for Applied Optimization, University of Florida

Abstract

Smart manufacturing (Industry 4.0) is the fourth industrial revolution. With advances in information and telecommunication technologies and data enabled decision making, smart manufacturing can be an essential component of sustainable development. We are going to discuss some successes and focus on data enabled decision making and optimization applications. In addition, we will discuss future research directions and new challenges to society.
